EXPERIENCE

FULL-STACK SOFTWARE DEVELOPER

November 2021 – Present

RainFocus, Lehi, Utah

- Built new frontend features and components in React, and developed corresponding backend functionality in Java, MySQL, Redis, and ElasticSearch
- Actively contributed innovative ideas which influenced team and company's objectives.
- Consistently attained the highest performance metrics within the team each sprint.
- Promoted from junior to mid-level developer after 1 ½ years

FULL-STACK SOFTWARE DEVELOPER, CONTRACTOR

May 2022 – September 2022

Verifi-MINT

- Worked on initial admin site (React) and corresponding backend (Django), developing tools and features to prepare for product launch

ARCHITECT & PRODUCTION TECHNOLOGY MANAGER

July 2015 – July 2021

CRSA Architects, Salt Lake City, Utah

- Managed multiple multifamily projects from inception through construction administration.
- Coordinated the efforts of the design team, including the consultants and owner representatives.
- Created a comprehensive standards handbook and provided training to employees in order to increase the quality and uniformity of construction documents.
